

# Trios!

## How to play 'Trios!'

You will need some counters and the attached board game to play this game.

**Rhyming Trios:** Place the counters on this chick and the cards in a pile face down. The first player takes a card and has to think of words that rhyme with the picture. If they can think of three words they can move on three spaces. If they can think of two words they can move on two spaces and if they think of one rhyming word they can move on one space.

**First Sound Trios:** You can also use this game to work on initial sounds in words. Instead of thinking of words that rhyme with the picture ask the child to think of words that begin with the same sound.
